EXPERIENCE

Ryan Jones joined WJE in 2022 and is a skilled architect with more than twenty-five years of architectural experience focused on complex building systems and components. In his current role, Mr. Jones investigates and designs repairs to building enclosures. He also provides building enclosure consulting services for new projects.

Mr. Jones's past work includes a wide range of projects from healthcare, higher education, sports facilities, commercial, mixed-use, industrial, and historic rehabilitation. He has been responsible for building design, detailing, code analysis, master planning, programming, furniture, finish/material selection, LEED administration, and building enclosure commissioning.
